Clean Bond

Evaporator Coils

Make Tough Metal Cleaning Jobs Easier

Clean Bond is a cleaner and molecular degreaser in one. It's professional strength, working at a chemical level to isolate then bond with oil deposits and small particles. This molecular action breaks up dirt and grime, making tough jobs easier.

Clean Bond was developed specifically for the dirtiest of HVAC environments. It's easy to use, commercial strength, and, it's gentle on coils and fins.

Clean Bond

- Professional Results
- Breaks up dirt and debris buildup.
- Breaks up grease
- Bonds with oils to wash them down the drain
- Gentle on metals
- Easy to use

Evaporator Coil Cleaning

Follow the simple mixing instructions, then spray. Let Clean Bond sit to allow it time to break up deposits. Turn on the fan back on and rinse.

Read full instructions prior to use

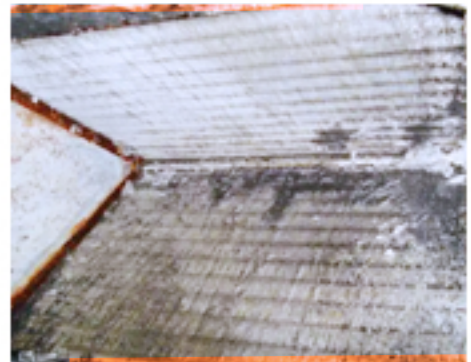

Fresh Lemon Scent

Evaporator Coil Cleaner

Dirty Coils are a Big Problem

Coils that are covered in buildup, mold, and other deposits:

- Make the unit work harder
- Inhibit the heat transfer process.
- Raise energy usage and costs.
- Accelerate corrosion
- Eventually lead to early failure of the unit.

- 8oz vial cleans a 2 ton evaporator coil.
- Available from 8oz to 1 gallon sizes.
- Spray bottle included.

After cleaning, use First Strike Micro Coat to maintain buildup free and mildew resistant coils
All year long.
