**PANCRETE**

## Drain Pan Metal Resurfacer

Pancrete is the trusted name in drain pan metal resurfacing. Clients have been using our product for over 20 years!

HVAC units are an expensive investment. Replacing a viable unit because of the drain pan is a waste. Pancrete pours over the old condensate pan, forming a new pan surface, that's stronger and more resistant than the manufacturers pan.

- Self-Leveling
- Permanent Corrosion Resistance
- Limited Downtime
- Puts a stop to damaging leaks
- Mildew Resistant
- Reinforces Structural Integrity
- New, Easily Cleanable Pans

### It's Easy to Apply Pancrete

Put the unit back in service in hours!

1. Clean and prepare the surface
2. Mix Pancrete Part A and B
3. Pour out a new pan
4. Allow to dry for 4-6 hours
5. Put the unit back into service

The new pan is stronger than ever

- it's submersible
- Anti-corrosive
- Chemical resistant
- Smooth enamel surface helps prevent water from gathering, and becoming stagnant

### Protect Investments from the Start

Easily Apply Pancrete to new units, to protect them from the start. Be proactive to avoid leaks and all the other problems a damaged drain pan can cause.
