

# Dispenser Guard

Continual Clean

For Beer and Beverage  
**Drains, Pans and  
Recirculations Cases**

## Performance

Dispenser Guard is a polymer core strip, covered by a knit enclosure. When it encounters water, Dispenser Guard releases cleaning agents that keep pans and lines clean. During periods when no water is present, the strip will retain its ingredients.

## Dispenser Guard

- Continual Clean
- Keeps Drain line clean
- Prevents Sugar Snakes
- Eliminates backups and clogs
- Controls Odors
- Time-Release±
- Non Dissolving

## Dispenser Guard lasts for months.

One DG-DP for each two taps cleans for up to two months  
One DG-RU will keep recirculation cases fresh and clean

NOT TO SCALE Actual size :4.5"x1.5"

Cleans  
**drip pans and  
drain lines**  
everytime  
they're used

## Physical Characteristics

Dispenser Guard is a slender polymer strip, enclosed in black fabric. The design makes it easy to fit in the beverage drain pan. It remains the same size and weight in water, which keeps it from floating away. It won't dissolve. The knit enclosure keeps the polymer core intact and visible for easy removal.
